INTRODUCTION

This report presents information from the 1971 Census of Canada on the employment income of persons 15 years and over, who reported that they worked one or more weeks in 1970, either full-time or part-time. Data are shown for census metropolitan areas, census agglomerations and cities, towns and villages and other municipal subdivisions of 10,000 population and over.

Average and median income figures in this report are calculated only for persons reporting employment income. Medians are calculated from more detailed group data than those shown in this report.

Comparability with 1961 data: Coverage in the 1961 Census was from a 20% sample of non-farm private dwellings only, and was exclusive of the Northwest Territories. In 1971 coverage was extended to include farm and collective dwellings and the Northwest Territories. The data from the two censuses are therefore not directly comparable.

The information in this report was collected on a 33 1/3% sample basis. Information on the sample and the weighting system can be found in the introductory report to this volume (see Catalogue No. 94-701).

The 1971 Census figures in this report have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports.

Note: Aggregate income calculated from these data should be used with caution as averages were calculated prior to rounding.

Ce bulletin présente des renseignements du recensement du Canada de 1971 sur le revenu de l'emploi des personnes de 15 ans et plus qui ont travaillé une semaine ou plus en 1970, soit à plein temps, soit à temps partiel. Les données sont indiquées pour les régions métropolitaines de recensement, les agglomérations de recensement et les cités, villes et villages, et autres subdivisions municipales de 10,000 habitants et plus.

Dans ce bulletin, le revenu moyen et le revenu médian ne sont indiqués que pour les personnes ayant un revenu de l'emploi. Les médianes sont calculées d'après des données de groupe plus détaillées que celles présentées ici.

Comparabilité avec les données de 1961: Au recensement de 1961, les données étaient fondées sur un échantillon de 20 % des logements privés non agricoles seulement et excluaient les Territoires du Nord-Ouest. En 1971, le champ d'observation a été étendu aux logements agricoles et aux logements collectifs, ainsi qu'aux Territoires du Nord-Ouest. Les données des deux recensements ne sont donc pas directement comparables.

Les renseignements de la présente publication ont été recueillis sur un échantillon de 33 1/3 %. On trouvera des renseignements sur l'échantillon et le système de pondération dans l'introduction de ce volume (voir la publication n° 94-701 au catalogue).

Par souci de confidentialité, les chiffres du recensement de 1971 publiés ici ont été soumis à une formule qui interdit la possibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités (y compris tous les totaux) des tableaux sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De plus, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences.

Nota: Les chiffres du revenu total fondés sur ces données doivent être utilisés avec circonspection, car les moyennes ont été calculées avant l'arrondissement.

Publications of the Census of Canada, 1971

This report is one of the Volume Series of publications of the 1971 Censuses of Population, Housing and Agriculture. Altogether, there are some 225 reports in this series prepared in such a way that by removal of their covers the contents can be combined to form the materials comprising the 6 volumes and 25 separate volume parts in the entire series. A hard-covered binder, suitably titled, is included in the composite price to purchasers of the complete set of reports for any given volume part.

Catalogue of reports

A catalogue is available which describes the individual reports in the Volume Series of 1971 Census publications as well as reports in other series (i.e., Advance Series, Census Tract Series, and Special Series). The catalogue also includes a price list and an order form. A copy of this catalogue may be obtained from Publications Distribution, Statistics Canada, Ottawa K1A 0T6. For further information on census publications, address your inquiry to Information Division, Statistics Canada.

How to order reports

Orders for reports may be sent to Publications Distribution, Statistics Canada, Ottawa K1A 0T6, or to Publishing Division, Information Canada, Ottawa K1A 0S9. Enclose payment with your order in the form of a cheque or money order made payable to the Receiver General of Canada. If more convenient, census publications may be ordered from Information Canada bookstores in Halifax, Montreal, Ottawa, Toronto, Winnipeg, or Vancouver. For other details concerning deposit accounts, bulk orders, etc., contact Publications Distribution, Statistics Canada.

Other forms of publication

In addition to the tabulated results of the 1971 Census published in reports and bulletins, a large number of tables will be issued to users as copies of computer print-outs. These will also be available in microform. A variety of statistical tables may be purchased on computer "summary" tapes for further computer analysis by users. Details of the content, prices, and availability of census tabulations in these output media may be obtained from the User Inquiry Service, Census Field, Statistics Canada, Ottawa K1A 0T7.

Special tabulations

To the extent that confidentiality constraints permit, Statistics Canada will produce for users at cost, special tabulations not already included in the planned tabulation programme. Requests should be sent to the Census User Inquiry Service specifying clearly the precise classifications or cross-classifications and the geographic areas. The exact categories for each characteristic and a rough table layout should be included.

Maps and geographic files

Large-scale maps may be purchased to show the boundaries of enumeration areas (i.e., the territory covered by each Census Representative in taking the census), as well as small-scale maps of census divisions and other statistical areas. Supporting documentation relating to the census geographic files (i.e., place names, codes, etc.) are available in tabular form identifying the component enumeration areas of administrative and statistical units (e.g., towns, villages, municipalities, tracts). Further details, including costs to users, may be obtained from the User Inquiry Service of the Census Field of Statistics Canada.

Il faut inclure les catégories exactes pour chaque caractéristique et une ébauche de la disposition des tableaux.

Cartes et fichiers géographiques
